seeto
who lives with
cancer

Twelve-year-old Ruby of Auckland was diagnosed with cancer in October 2006 after she discovered a lump on her side following a family holiday in Fiji. After tests at Starship Children's Hospital it was discovered she had a large growth on her liver. She underwent a seven hour operation which removed the tumour along with 70% of her liver and her gall bladder. During the following year she underwent fourteen cycles of chemotherapy.

She lives with her parents Sharon and Ron, sister Noon 9, older brothers Mika and Joss and two cats Misty and Dash.

Ruby loves scrapbooking, shopping, netball and dancing.
